

MD iMap Dataset Fact Sheet

Identification Information	
Title	This is the name by which the data set is known. It is the filename for the data set.
Abstract	A brief narrative summary of the data set.
Purpose	A summary of the intentions with which the data set was developed.
Authority	Identify any statutes or regulations associated with the data set.
ISO Topic Category	This is a high-level geographic data thematic classification to assist in the grouping and search of available geographic data sets. This can be any of the following: Farming, Biota, Boundaries, Climatology/Meteorology/Atmosphere, Economy Elevation, Environment, Geoscientific Information, Health, Imagery/Base Maps/Earth Cover, Intelligence/Military, Inland Waters, Location, Oceans, Planning Cadastre, Society, Structure, Transportation, Utilities/Communications. A description of each topic category can be found at http://gis.glin.net/ogc/themes.html .
Contact Information	
Contact Organization	The organization associated with the data set. Used in cases where the association of the organization to the data set is more significant than the association of the person to the data set.
Contact Person	The name of the person associated with the data set. Used in cases where the association of the person to the data set is more significant than the association of the organization to the data set.
Contact Voice Telephone	The telephone number by which individuals can speak to the organization or individual associated with the data set.
Contact Electronic Mail Address	The address of the electronic mailbox of the organization or individual associated with the data set.
General Information	
Progress	The state of the data set. This can be any of the following: Complete, In work, or Planned.
Maintenance and Update Frequency	The frequency with which changes and additions are made to the data set after the initial data set is completed. This can be any of the following: Continually, Daily, Weekly, Monthly, Annually, Unknown, As needed, Irregular or None planned.
Currentness Reference	The basis on which the time period of content information is determined. This can be either of the following: ground condition or publication date.
Access Constraints	Restrictions and legal prerequisites for accessing the data set. These include any access constraints applied to assure the protection of privacy or intellectual property, and any special restrictions or limitations on obtaining the data set.

Use Constraints	Restrictions and legal prerequisites for using the data set after access is granted. These include any use constraints applied to assure the protection of privacy or intellectual property, and any special restrictions or limitations on using the data set.
Source Scale Denominator	The denominator of the representative fraction on a map (for example, on a 1:24,000-scale map, the Source Scale Denominator is 24000).
Data Model	Identify the geodatabase model that the data is a part of.
Geodatabase	Identify the geodatabase the data was derived from.
Application(s)	Identify any applications that leverage the data set (e.g. MDiMap, GreenPrint, etc...).
Reference(s)	Identify any hyperlinks or references to the data set (e.g. MD Land Records, Plat.net).
Comments	Any additional information you would like to provide regarding the data set.
